**Dcosmos PTE.LTD. | Somerset Road, Singapore**

# Notice

1. This white paper is provided solely for general informational purposes regarding the Dcosmos project, and the information contained herein is current as of the date specified on the cover.
2. The contents of this white paper are subject to continuous updates, review, and revision. We reserve the right to update this white paper at any time.
3. The objectives presented in this white paper may not necessarily be achieved or completed as intended.
4. Token purchases carry high speculation and the risk of principal loss. Prospective purchasers should carefully consider all related risk factors.
5. This white paper itself does not guarantee security. In many jurisdictions, token sales are subject to strict scrutiny, and relevant regulations are not fully established.
6. Cryptocurrency regulations are constantly changing, so purchasing PWR tokens may involve significant risk, and prospective purchasers should seek expert advice in advance.

# Foreword: New Challenges and a Great Journey

As of Q2 2025, the global blockchain market has entered a stabilization phase in the WEB3 sector, with the global ecosystem expanding and developing further. Previously experimental projects are now proceeding with stable and clear thematic direction.

In line with these overall changes in the blockchain ecosystem, Dcosmos aims to lead new strategic challenges. Dcosmos is no longer a project focused solely on the blockchain gaming ecosystem, but seeks to build a hybrid ecosystem where WEB3 and WEB2+WEB3 coexist.

As a first step, we are actively embracing the Solana ecosystem, which leads the WEB3 market and enjoys broad global support, preparing to welcome the vast Solana user base into our ecosystem.

Second, for proven projects such as blockchain games, we aim to evolve into a multi-platform that supports new content like meme coins, DeFi, AI, NFT launchpads, and RWA (Real World Assets), by forming alliances and expanding regardless of genre.

Third, we plan to change our profit distribution model so that Token holder/participant/ecosystem members can find various long-term revenue models within the ecosystem. In addition to gaining growth value by investing in initial tokens, we will provide opportunities for active staking and DeFi participation, maximizing and diversifying profit distribution, and realizing "The Ownership Economy," where users become both owners and beneficiaries of the platform, receiving rewards according to their participation and contributions.

## 2. Dcosmos Project Vision and Goals

The Dcosmos project adopts 'The Ownership Economy' as its core value, aiming to build a true Web2+Web3 hybrid ecosystem that goes beyond a simple blockchain game platform and provides value and ownership to all participants.

- **Building a Hybrid Ecosystem (Web2+Web3)** : By combining the accessibility and convenience of traditional Web2 services with the decentralized ownership and transparency of Web3, we provide an integrated environment where a broader public can easily experience and benefit from blockchain technology.
- **Game-First Approach and PNE (Play N Earn) Model Innovation:** We focus on content that prioritizes genuine fun and gameplay over yield, driving continuous user inflow and promoting the long-term growth of the PWR-based platform. We present a more fair and sustainable PNE model by advancing the reward system based on player participation and contribution.
- **Player-Centric Participatory Platform** : Players become not only consumers but also producers and Token holder/participant/ecosystem members in the game industry, with their ideas materializing as new content on the platform. This principle applies to all content and services.
- **Decentralized Governance (D.A.O):** All stakeholders participating in the Dcosmos platform form a DAO based on PWR, and become the main agents in decision-making regarding major platform policies and operations. Users holding more than 5% of PWR become "Committee" members, gaining the opportunity to participate directly in platform operations.
- **Strategic Migration to Solana Chain:** By transitioning to the Solana ecosystem, which leads the global WEB3 market and enjoys broad

support, we welcome the fast transaction speeds, low fees, and vast user base of Solana as core users of the Dcosmos ecosystem.

- **Expansion to Multi-Platform:** We aim to evolve into a multi-platform supporting new, validated content such as meme coins, DeFi, AI, NFT launchpads, and RWA, forming alliances and creating synergy with diverse projects beyond blockchain games.
- **Diversification of Token holder/participant/ecosystem members Profit Models:** In addition to initial token investment returns, we support maximizing and diversifying profit distribution through active staking and DeFi participation. Users become both owners and beneficiaries of the platform, building a new economic system where they are rewarded for their participation and contributions.

### 3. Gamebitcoin PoWER (PWR) Token Economy

Gamebitcoin PoWER (PWR) is the core utility and governance token of the Dcosmos ecosystem. Through its transition to the Solana chain, its influence will expand further, becoming the central axis of the expanded ecosystem.

- **Token Name:** Gamebitcoin POWER (PWR)
- **Base Chain:** Solana (Solana)
  - A soft migration from the existing Polygon chain to the Solana chain will be conducted.
- **Total Supply:** 5 billion
  - The total supply of 5 billion on the Polygon chain will be transferred to the Solana chain, with no change in the total issuance.

- **Soft Migration Method :**
  - Holders of Polygon PWR coins will be supported to swap to Solana-based PWR coins.
  - The list of coins swappable with PWR and specific migration methods will be transparently announced through the Dcosmos community (official website, announcement channels, etc.).
  - Only Solana-based PWR coins will be used on newly listed exchanges, marking a strategic transition to the Solana chain. The importance of Polygon PWR may gradually decrease, but the transition will be supported to minimize inconvenience for holders.
- **Token Distribution:**
  - Token distribution ratios follow the existing model. There is no change in total supply or allocation ratios due to the migration.

| <b>Allocation</b> | <b>Ratio</b> | <b>Quantity<br/>(Assuming a<br/>total of 5<br/>billion tokens)</b> | <b>Detailed description</b>                                                                                                                                                                                                                                                                        |
|-------------------|--------------|--------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Eco-Pool          | 40%          | 2,000,000,000<br>tokens                                            | A core fund for the growth of the Dcosmos ecosystem. This is the main allocation used when PWR is exchanged as a governance token with individual project coins and alliance project coins within the ecosystem. It is utilized for user rewards, partnerships, and ecosystem activation programs. |

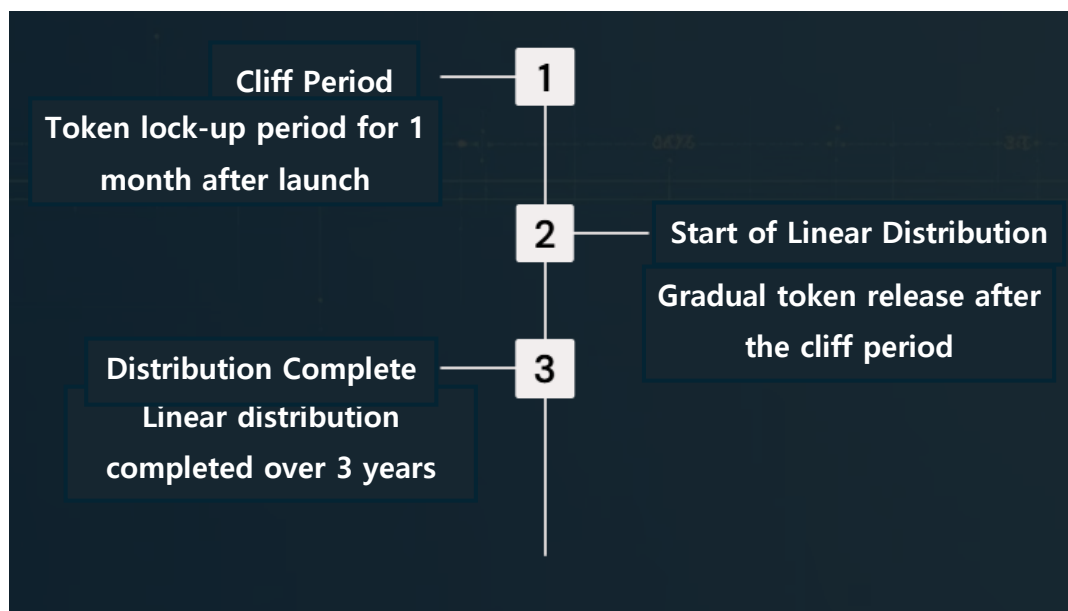

|              |             |                             |                                                                                                                                                                                                                                                                                                   |
|--------------|-------------|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Token Sale   | 20%         | 1,000,000,000 tokens        | Liquidity secured through token sales. This includes exchange listing fees and DEX liquidity                                                                                                                                                                                                      |
| R&D/MKT      | <b>25%</b>  | <b>1,250,000,000</b> tokens | Funds used for research and development as well as global marketing activities.                                                                                                                                                                                                                   |
| Founder      | <b>10%</b>  | <b>500,000,000</b> tokens   | The allocation distributed to the project founders and core team members.                                                                                                                                                                                                                         |
| Initial Cost | 3%          | 150,000,000 tokens          | Used for the project's initial operating costs and essential liquidity provision. Of this, 2,000,000 tokens are allocated to support the Solana migration swap. After the migration support period (the first year) ends, any remaining tokens from the migration swap allocation will be burned. |
| Cooperator   | 2%          | 100,000,000 tokens          | The allocation distributed to the project's early collaborators and advisors.                                                                                                                                                                                                                     |
| <b>Total</b> | <b>100%</b> | <b>5,000,000,000 tokens</b> |                                                                                                                                                                                                                                                                                                   |

- **Vesting Plan :**

- The initial allocation of PWR coins released on the Solana chain will have a 1-month cliff period.
- After the cliff period, distribution will occur linearly over 3 years, aiming for long-term stability and healthy token circulation in the PWR ecosystem.

- **Use Cases and Payment Methods for PWR Coin :**
  - **Core Governance Token:** PWR is the top governance coin of the Dcosmos ecosystem, leading key platform decisions and ensuring ecosystem stability.
  - **Integrated Payment Method:** Used as the main currency for all content, item, and service fees within the Dcosmos hybrid ecosystem.
    - ✓ **Swap with Project and Allied Coins:** Main coins of individual projects onboarded to the Dcosmos ecosystem (e.g., \$CTR of MotorCity, \$SSC for mini-game Shooting Star Character) and coins of external allied projects will be swappable with PWR based on market prices, primarily via the Eco Pool allocation. This enables dynamic connections between the internal economies of various games/content and the PWR ecosystem, strengthening PWR's governance and payment roles.
    - ✓ **Direct Payment in Blockchain Services:** In various blockchain services supported by Dcosmos (AI-based infrastructure, NFT launchpad, DeFi, etc.), PWR will be used as a direct payment coin alongside fiat proxies, USDT, RTX, USDC, and SOL.
  - **AI Service Usage:** Used as a payment method and reward for contributions in AI services within the Dcosmos ecosystem, such as accessing AI-based analysis tools, using AI strategy recommendation services, contributing to AI model training, and sharing profits from AI-generated content.
  - **Expansion into Meme Coin Territory:** PWR will be used for meme-related activities and event participation, meme content creation/curation rewards, and specific meme-related service

payments, actively integrating meme elements to encourage community participation and vitality.

- **Governance Participation:** PWR holders participate in the DAO to vote on major platform policies and operations. The governance function remains vital after the transition to Solana, forming the foundation of "The Ownership Economy."
- **Staking and DeFi Participation:** Token holder/participant/ecosystem members can stake PWR to contribute to platform operations and receive rewards. Integration with DeFi protocols enables participation in liquidity provision, yield farming, and other profit-generating opportunities, maximizing and diversifying profit distribution.
- **Ecosystem Contribution Rewards:** Rewards are given to partners, community contributors, developers, and bounty program participants who contribute to the platform.

## 4. Global Ecosystem: WEB2+WEB3 Hybrid Business Model

The PWR ecosystem forms an expanded ecosystem where all members participate, create, and share value, connecting with various Web3 content and Web2 services beyond the gaming industry. The introduction of AI services and DeFi/RWA will further innovate Dcosmos' business model.

- **Hybrid Content Model :**

**Blockchain Games (P2E)**

By launching proprietary NFT games such as the flagship game MotorCity and onboarding external games, Dcosmos attracts players and secures development funds through a GameFi token economy based on user support and investment. This enables the mass production of user-customized games.

**AI Services**

Dcosmos develops its own AI technologies and integrates with external AI solutions to provide users with differentiated experiences. This can be implemented in various forms, such as in-game AI assistants, AI-based investment/trading analysis tools, and AI creation tools.

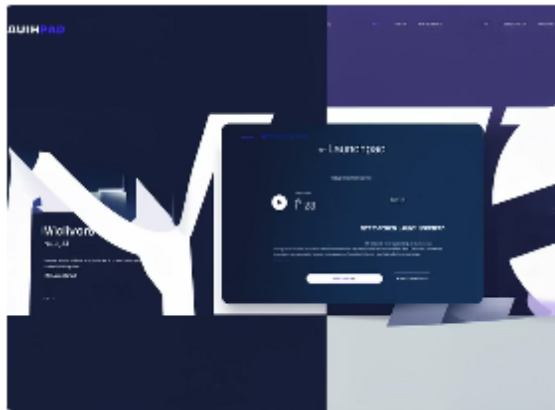

**Meme Coin Hub**

Beyond simple memes, Dcosmos incubates and supports community-based meme projects, activating the meme ecosystem through PWR.

**DeFi & RWA Integration**

Dcosmos offers DeFi services such as PWR-based staking and liquidity provision, and plans to expand the blockchain economy into the real world by integrating with real-world assets (RWA) in the future.

**NFT Launchpad**

Dcosmos supports the successful launch of new NFT projects and provides exclusive participation opportunities to PWR holders.

**API (Open API)**

Through Dcosmos's open API, all developers, content providers, and even Web2 services can easily access and integrate with the Dcosmos ecosystem. This enables autonomous content supply and seamless integration of Web2 and Web3 services.

- **Ecosystem Expansion and Revenue Sharing:**
  - PWR functions as the key payment and value storage medium within the platform and is designed to be mutually exchangeable with various internal/external coins via swaps.

- The introduction of new business models such as AI services, DeFi, and RWA expands the use of PWR beyond gaming, contributing to its value appreciation.
- Businesses with connections to ecosystem members can participate as partners by adopting PWR as a payment system, enabling flexible ecosystem expansion.
- As the PWR ecosystem grows, intermediate costs disappear, and consumption, production, and investment become integrated, resulting in more robust market-based content and increased participant benefits, completing a virtuous value chain.
- **Realizing "The Ownership Economy":** A portion of platform profits is redistributed to PWR holders through staking, DeFi participation, and other means, maximizing rewards for user contributions and participation, and realizing a true ownership economy.

## 5. Roadmap

Dcosmos will pursue technology development, ecosystem expansion, and community growth simultaneously through a clear and ambitious roadmap, making the "new challenge and great journey" a reality.

### **MotorCity Development Roadmap (Platform's Killer Content)**

- **2025. 2Q:** Prototype - Driving on the road, Physical Engine, 3D optimal design

- **2025. 4Q:** Semi Beta 1.0 - Field map, Networking with Server, NFT System, Single driving mode, Playing Effects
- **2026. 1Q:** Semi Beta 2.0 - Custom-tune the car, Owner system, Multi driving mode, Metaverse zone
- **2026. 2Q:** Close Beta 1.0 - Trading system, Social application, Event mode, Single play mode

## **Dcosmos Platform Expansion Roadmap: New Challenges and the Great Journey**

- **Short Term (July 2025 ~ Q4): Deploy Solana chain-based PWR coin smart contracts.**
  - Build and announce a soft migration swap mechanism for existing Polygon PWR holders.
  - Integrate PWR coin payment system into the Deri A.I. (Dcosmos AI service brand/module) platform (initial AI service payment function).
  - Launch the first AI service MVP and collect initial user feedback.
  - Promote listing of Solana-based PWR on major exchanges (future listings will use only Solana-based PWR).
  - Announce and begin technical integration of the first strategic partnerships for Web2+Web3 linkage.
- **Mid Term (2026) : Expansion of the hybrid ecosystem and diversification of revenue models**
  - Advance AI models and expand new AI service features (e.g., AI-based investment analysis tools, personalized game AI assistants).
  - Deepen PWR coin utility within AI services (e.g., premium feature access, AI model training participation rewards).
  - Announce and launch the first meme coin/DeFi/NFT launchpad partnerships and services.

- Activate PWR-based staking and liquidity provision (LP) DeFi pools.PWR
- Expand the global community and Web2/Web3 partnerships.
- **Long Term (2027 and beyond) : Strengthening Dcosmos ecosystem dominance and completing 'The Ownership Economy'**
  - Consider supporting additional blockchain networks such as BNB Chain if needed (suggesting multi-chain coin expansion).
  - Maximize PWR coin use within the Dcosmos ecosystem and external integration (various Web3.0 services and real-world economy linkage – RWA introduction).
  - Continuously upgrade services and secure market leadership through AI technology innovation.
  - Build a strong global brand and complete a new economic system where users become true owners and beneficiaries through "The Ownership Economy" based on PWR.
